Digi-Key has the capability to program a wide variety of devices. For more information regarding programming, contact the Custom Department at 1-800-344-4539 (ext. 5725) or email: custom.orders@digikey.com.

Equipment: • BP Microsystems Models BP-2600 and BP-3710 MK II • Capability to support over 21,000 devices ranging from something as small as a SOT23-6 up to a 144-TQFP

New Packaging and Feeding Options: Any of the following combinations available: • Tube-In, Tube-Out • Tray-In, Tray-Out • Tape-In, Tape-Out

Labeling: Hover Davis Print-On-Demand Labeler and various labeling sizes available.

PROGRAMMABLE OSCILLATORS:

Digi-Key offers Programmable Oscillators from several manufacturers. There are several SMT and Thru-Hole options available to choose from. Frequencies ranging from 1.000Mhz ~ 200.000Mhz are available depending on the electrical characteristics that are chosen.

DIGI-REEL®:

A Digi-Reel is a custom quantity reel of continuous cut-tape made from a manufacturer's reel. A 15-inch leader and trailer, complete with sprocket drive holes, are attached so that the sprocket holes are aligned enabling direct and flawless feeding into automated board assembly equipment. It is then rewound on a plastic reel according to Electronics Industries Alliance (EIA) standards. In most instances, we can assemble this item specifically for your order and ship it the same day. If you place this item on your order, it will show up backordered. We will contact you if we are unable to fulfill your order.

A $7.00 "reeling fee" will be charged for each reel and will be included in the cost of your reel.

Digi-Reels are a custom product and are non-cancelable and non-returnable.

BATTERY PACKS:

Digi-Key has the capability to assemble battery packs out of NiMH, NiCAD, and Alkaline batteries. We offer standard battery packs which are shown in the battery section of this catalog, and can accommodate many custom battery pack requirements. Digi-Key also offers single batteries with tabs for you to solder your wire leads to.

CABLE ASSEMBLY SERVICES:

Digi-Key offers several different types of ribbon cable assemblies in a number of *standard* lengths. We also provide assorted pre-terminated jumper wires in several different colors and lengths as standard products.

We have the capabilities to offer ribbon cable assemblies in many different *custom* configurations and lengths as well as some jumper wires. We can also provide a limited number of discrete wire assemblies, depending on tooling and quantity.

Additional Information

STATIC PROTECTION:

Protection of static sensitive parts is a MUST in today's semiconductor market.

To ensure the quality that Digi-Key customers have come to expect, the Digi-Key Static Control Program includes proper static safety protection in the following areas: • Receiving, Incoming Inspection, and QC • Product Storage • Order Picking • Final Inspection • Packaging and Shipping

Shielded metallized bags are used in order picking and any time static sensitive product is being handled within the building. 100% recyclable paper packaging (low static generating) is used in packaging and shipping.

As our program is continuously updated with the latest static control technology, you can be reassured that Digi-Key's static sensitive parts are quality safe, *all the way to your door step!*

RoHS COMPLIANT PRODUCT:

Digi-Key continues to work with its more than 350+ supplier partners to provide customers with RoHS compliant product. Symbols are used to identify compliant product in the catalog. When an entire page or series of product is compliant, a RoHS symbol appears at the top of the page or section. In situations where a series of product is not all compliant, the compliant product is identified by a ◆ symbol beside the Digi-Key part number. Our Integrated Circuits section will identify compliant product with an asterisk (*) beside the part number description. Please note that due to inventory turns, fluctuations, and catalog cycle times, the most current and accurate information is available at www.digikey.com/environment or by calling 1-800-344-4539. Product that is available in cut tape and/or full reels should be reviewed prior to ordering to ensure that you receive your preference.

Digi-Key Terms and Conditions

All orders placed with Digi-Key Corporation (“Digi-Key”) for products available from Digi-Key (the “Products”) are subject to these terms and conditions (the “Agreement”). Any purported change to the terms of this Agreement that is submitted by a purchaser in any additional documentation is hereby expressly rejected. Orders placed on forms deviating from the order form provided in this catalog (the “Order Form”) may be accepted, but solely on the basis that the terms of such Order Form and this Agreement will prevail.

1. Order Validation and Acceptance

When you place an order, we may verify your method of payment, shipping address and/or tax exempt identification number, if any, before processing your order. Your placement of an order with Digi-Key is an offer to purchase our Products. Digi-Key may accept your order by processing your payment and shipping the Product, or may, for any reason, decline to accept your order or any part of your order. No order shall be considered to be accepted by Digi-Key until the Product has been shipped. If we decline to accept your order, we will attempt to notify you using the email address or other contact information you have provided with your order. Delivery dates provided in connection with any order are estimates only and do not represent fixed or guaranteed delivery dates.

2. Quantity Limitations

3. Electronic Communication

When you place an order with Digi-Key, you are required to provide valid contact information, which we may use to communicate with you regarding the status of your order, advise you regarding shipment of backordered products, and to provide you with any other notices, disclosures or other communications relating to your order. You agree that Digi-Key will not be responsible for any damage you incur, or information you do not receive, as a result of your failure to provide valid contact information.

4. Pricing and Product Information

In the event we discover a material error in the description or availability of a Product that affects your outstanding order with Digi-Key, or an error in pricing, we will notify you of the corrected version, and you may choose to accept the corrected version, or cancel the order. If you choose to cancel the order, and your credit card has already been charged for a purchase, Digi-Key will issue a credit to your credit card in the amount of the charge.

5. Late Payments; Dishonored Checks

You shall pay Digi-Key all costs incurred by Digi-Key in collecting any past due amount from you, including all court costs, collection costs, and attorney's fees. If a check you give us for payment is dishonored for any reason by the bank or other institution on which it is drawn, you agree to pay us $20.00 as a service charge (if the check cannot be redeposited) pursuant to Minnesota Statutes § 604.113.

6. Out of Stock

OMRON

XG5 Discrete and XG4 IDC Connectors

XG5: Discrete Wire Connectors

Omrons's XG5 discrete wire termination connectors are trouble free IDC connectors that accommodate individual wires with a quick and reliable IDC connection. Press fitting connections (IDC) are faster than crimping and more reliable thus reducing man-hours and improving yield. The contacts are built into the connectors thereby reducing required parts count, storage and have a large current rating (3A). By using the simple unique lock-lever system, these connectors can be locked to the XG4A Locking Header or the XG4C Low Profile Box Headers.

Features: • MIL Plugs discrete wiring capability • Adaptable to a variety of covers for space-saving and discrete wire termination • Conforms to UL standards (file no. E 103202) and CSA standards (file no. LR 62678)

Specifications: • Rated Current: 3A • Rated Voltage: 300VAC • Contact Resistance: 20mΩ maximum • Insulation Resistance: 1,000MΩ minimum • Dielectric Strength: 650VAC for 1 minute • Insertion Durability: 50 times • Ambient Temperature (Operating): -55°C ~ 85°C

XG4: Ribbon Cable Connectors

Omron's Industry standard ribbon cable connectors conform to MIL standards (MIL-C-83503) and offer cable connections for both female socket connectors and male header connections. Unique locking latch options ensure reliable connector mating in high vibration or hard to access area's. Protected headers are available in Vertical PCB, Right Angle PCB and an IDC cable mounted version. Box-type headers are intended for low profile applications and space saving requirements. All XG4 connectors have a polarizing slot thereby preventing connectors from being plugged in either direction.

Features: • UL recognition (File No. E103202)

Specifications: • Rated Current: XG4M and XG4E: 1A; XG4A and XG4C: 3A (rated current will depend on the socket you are using) • Rated Voltage: XG4M and XG4E: 250VAC; XG4A and XG4C: 300VAC • Contact Resistance: 20mΩ maximum • Insulation Resistance: 1,000MΩ minimum • Ambient Temperature (Operating): -55°C ~ 105°C

JST

FLZ Series 0.5mm FFC/FPC Connectors

This extremely small 0.5mm (.020") pitch connector with a height of only 2.0mm (.079") above the PCB surface allows interconnection in extremely small spaces and is an example of JST's leading edge technology. **Features:** • Zero insertion force mechanism increases wear resistance and extends the connector's mating life • Heat resistant design suitable for surface mounting to allow for reflow soldering • In-line surface mount tails for easy inspection • Two types of connections: normal or reverse configurations; the FFC/FPC is positioned with its mating surfaces facing upward for the normal configured connector, while the reverse configuration requires that the FFC/FPC be positioned with its mating surfaces facing down giving the engineer greater freedom in designing the circuitry. **Specifications:** • Current Rating: 0.5A AC/DC • Voltage Rating: 50V AC/DC • Temperature Range: -25°C ~ 85°C • Withstanding Voltage: 200V AC/minute

FMN Series 1.0mm FFC/FPC Connectors

Features: • Height: 3.0mm (.118") side-entry type; 5.1mm (.201") top-entry type • There are no slides or levers to operate on the reduced insertion force connector. It requires 1/2 the insertion force of JST's conventional FFC connector, but retains stable contact performance when subjected to environmental and mechanical stresses. • SMT type connectors have heat-resistant housings so solder reflow is possible. They also have solder tabs for extra strength. **Specifications:** • Current Rating: 0.5A DC • Voltage Rating: 50V DC • Temperature Range: -25°C ~ 85°C • Applicable PC Board Thickness: 1.6mm (.063)

0.5mm and 1.0mm Pitch FFC/FPC Connectors FH12, FH12A, FH12F and FH12S Series — "Flip-Lock" SMT/ZIF Type Flexible Printed Circuit Board Connectors

The FH12 Series of miniature connectors for FPC/FFC use brings form to the newly developed "flip-lock" concept and can be used with Surface Mount Technology (SMT) to eliminate the problems of the contemporary slide-lock system. These connectors have a contact spacing of 0.5mm, are suited to high density mounting, and are based on a single-action Zero Insertion Force (ZIF) structure for easy connections. Types with top or bottom contacts, and vertical mounting are available to suit your applications.

Materials/Finish: • Insulation: Polyamide Resin, beige **• Actuator**: PPS Resin, dark brown (UL94V-0) **• Contacts**: Phosphor Bronze, gold plating **Electrical: • Rated Current**: 0.4A **• Insulation Resistance**: 500MΩ minimum 100VDC **• Withstanding Voltage**: 150VAC for one minute **• Contact Resistance**: 50mΩ maximum (***Note:*** *When all conductors are to continuously carry the rated current, set the current to 70% of the rated current value.)*

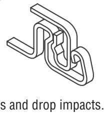
Panasonic Board to Board Connectors

Panasonic Electric Works

Constructed for high reliability in various environments, these six connector series will make mobile devices tougher than ever. The F4, F4S, P4, P4S, P5K, P5KS, and P5KF employ our unique "TOUGH CONTACT" which has significant ability to withstand foreign particles and is highly resistant to shock, making them indispensable to all compact mobile devices. Developing products can be more confident by using our Tough Contact connector series. Applications include Compact portable devices, Cellular phones, DVC, Digital cameras, or anywhere that board-to-board or board-to-FPC cables are required. **F4 Series:** The lowest profile class among two-piece connectors in the world. Two-piece connectors achieve both a 0.4mm pitch and an ultra low profile of 0.9mm high when mated, contributing to further thickness reduction of products. Strong resistance to adverse environments. Utilizes "TOUGH CONTACT" construction for high contact reliability. The bellows-type double contact structure provides a high resistance to twisting and shock, ensuring a high contact reliability. Ideal for board-to-FPC connection. **F4S Series:** Space-saving (3.6mm widthwise). The required space is smaller than the F4 series (40-contact type): Header - 38% smaller, Socket - 27% smaller. Clips for preventing the solder joints from being removed. Highly reliable "TOUGH CONTACT" has strong resistance to adverse environments. The original bellows contact has high resistance to drop impact and twisting forces. **P4 Series:** Narrow pitch connectors for board-to-board and board-to-FPC connection. The connector is constructed with impact dispersion keys inside the body to disperse shocks when dropped. A high level of shock resistance is ensured by dispersing impact over the four locations where the socket indentations and header protrusions are mated together. **P4S Series:** Space saving when compared to the P4 series with retention fitting: Header - 34% smaller, Socket - 38% smaller. This will contribute to the weight and size savings in devices. (Comparison made with 30 contacts) **P5K and P5KS Series:** Narrow pitch connectors for board-to-board connection. Even with the low profile, the effective mating length has been extended to ensure that there is some latitude in the mating. Contacts are highly resistant to shock caused by dropping and employ the original bellows contact construction. **P5KF Series:** The header and socket have the same dropping shock and torsion resistant construction as the bellows-type contact. The connector is a two-piece structure with 0.5mm pitch. Strong resistance to adverse environments. Utilizes construction for high contact reliability. Simple locking structure. Superior mating operation with click feel to indicate that mating is complete.

TOUGH CONTACT



Highly reliable "TOUGH CONTACT" has strong resistance to adverse environments. Contacts are formed by bending a thin metal sheet. This provides the contact parts with adequate spring characteristics ensuring greater resistance to twisting forces and drop impacts.

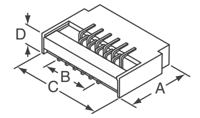
0.30mm (0.012”) FFC-FPC Connectors

SFYL-U and SFY Series



The SFY and SFYL-U Series are 0.30 mm (0.012 in) pitch cable to board connectors with ultra low profiles. The series adopt the Surface Mount Technology (SMT) and Zero Insertion Force (ZIF) or Low Insertion Force (LIF) mechanism, which enables easier cable insertion. These are suitable for high density design of consumer equipment, especially CD-ROM Drive, Digital Still Camera (DSC), Digital Video Camera (DVC) and Mobile Phone.

Features:
• Ultra low profile design provides a body height of 0.047 in. (1.2mm) for SFYL-U Series and 0.079 in. (2.0mm) for SFY Series • Easy handling cable insertion by actuator driven • High cable retention force • Design against solder and flux wicking

Materials:
• **Housing/Actuator:** Glass reinforced high temperature thermoplastic (UL 94V-0) • **Color:** Housing: White; Actuator: Black • **Contact:** Copper Alloy

Mechanical and Electrical Performance:
• **Durability (Actuator Operation):** 10 cycle maximum • **Temperature Range:** -25°C ~ 85°C • **Insulation Resistance:** 50MΩ minimum • **Withstanding Voltage:** AC 200V • **Current Rating:** AC/DC 0.2A

SMT/ZIF Type

The Gas-Tight, High Pressure (GTH) contact system ensures a low cost connection with reliability equal to gold plating. The Zero Insertion Force (ZIF) connection allows an increased number of mating cycles with minimal wear. The ZIF pre-holding process provides a stable and reliable mating operation. The slider ensures maximum cable retention with a minimum size. Fork shaped contacts mean stable and low contact resistance. The cable lock option provides cable strain relief as well as full retention of cable.

Specifications: • Contact Resistance: 30mΩ maximum; 50mΩ maximum for 10085901-6015ELF • Insulation Resistance: 100MΩ minimum; 50MΩ minimum for 10085901-6015ELF • Durability (Mating Cycles): 20 Cycles • Temperature Range: -55°C ~ 85°C • Current Rating: 0.5A AC/DC • Voltage Rating: 50V AC/DC

62674 Series:
• Housing: Resin, Glass Reinforced, UL 94V-0, Black • Slider: Resin, Glass Reinforced, UL 94V-0, Brown • Contact: Phosphor Bronze. Tin Alloy Plated

62684 Series:
• Housing: Glass Filled Thermoplastic, UL 94V-0, Beige • Slider: Glass Filled Thermoplastic, UL 94V-0, Black • Contact: Phosphor Bronze, Tin Alloy Plated

SFV Series:
• Housing: Polyamide Resin, Glass Reinforced, UL 94V-0, Black
• Slider: PPS Resin, Glass Reinforced, UL 94V-0, Brown (with cable-lock: Black) • Contact: Phosphor Bronze, Tin Alloy Plated

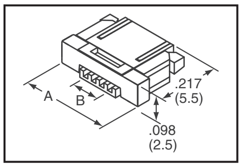
SMT/ZIF Type



The Gas-Tight, High Pressure (GTH) contact system ensures a low cost connection with reliability equal to gold plating. The Zero Insertion Force (ZIF) connection allows an increased number of mating cycles with minimal wear. The ZIF pre-holding process provides a stable and reliable mating operation. The slider ensures maximum cable retention with a minimum size. Fork shaped contacts mean stable and low contact resistance. The cable lock option provides cable strain relief as well as full retention of cable.

Specifications: • Housing Material: Glass Reinforced PPS, UL 94V-0 • Contact Material: Phosphor Bronze, Matte pure Tin plated • Contact Resistance: 30MΩ maximum • Insulation Resistance: 500MΩ minimum • Durability (Mating Cycles): 20 Cycles • Temperature Range: -55°C ~ 85°C • Current Rating: 0.5A AC/DC • Voltage Rating: 100V AC/DC

PUD Series

2.0mm Connectors

The PUD Series offers compact size and provides stable contact performance under high vibration, distortion, and unexpected external forces. The leaf spring structure of the contact is designed to help prevent deformation due to unexpected forces. The housing receptacles are keyed to prevent accidental reverse mating or mating to a header without the same number of circuits. The header is designed with a secure locking device for applications that require high reliability under adverse conditions. An audible click is heard when mating the receptacle housing with the header.

EH Series

2.5mm Connectors

Features: • Compact and Slim: This connector is designed to be compact and unusually thin. It measures only 8.1mm (.319") high after mounting and is just 3.8mm (.150") wide. • Highly Reliable Contact: The contact has long dimples near the center that ensure continuity of low voltage and low current circuits at all times, even under conditions of vibration and abusive prying. • Polarizing Guides: The header and housing have guides to prevent improper mating. • Whisker Prevention: The contact material is treated with a reflow process, and the square post is copper-undercoated and tin/lead-plated for whisker prevention. • Easy and Effective Crimping: Although the contact is compact, it has a long wire strip length, 2.6 ±0.4mm (.102" ±.016"). This long length is very useful for automatic crimping and when crimping shielded wires.

Specifications: • Current Rating: 3A AC/DC (22 AWG) • Voltage Rating: 250V AC/DC • Temperature Range: -25°C ~ 85°C • Applicable Wire: 32 ~ 22 AWG

Material and Finish: • Contact: Phosphor bronze, tin-plated • Housing: Nylon 66, UL94V-0, natural (white) • Posts for Headers: Brass, copper-undercoated, tin/lead plated • Wafer: Nylon 66, UL94V-0, natural (white)

Applicable PC Board Thickness: 0.8mm ~ 1.6mm (.031" ~ .063")

WPJ Series

Wire-to-Wire and Wire-to-Board Crimp Style Connectors

The new WPJ Series Wire-to-Wire and Wire-to-Board crimp style connector was designed for both extreme moisture and non-submersion applications. Major uses include automotive, appliance, underwater cameras or non-water resistance applications. Three different control key patterns prevent miss-mating while their unique terminal structure has been designed to withstand mating mistakes while maintaining the contact reliability. An inner lock housing feature prevents accidental disconnection to ensure connector mating integrity even under adverse conditions.

6.2mm Connectors

Features: • Since the contact retention lances are part of the housing rather than protruding from the contact, they cannot be damaged by handling. They allow the contact to be easily inserted and securely locked into the housing. • Since these contacts have large cross-sectional areas and high contact pressure, they can accommodate circuits requiring high power • Unique space-saving panel lock is designed to prevent tangling with wires or breaking in cold or dry weather

Specifications: • Current Rating: 20A maximum AC/DC • Voltage Rating: 600V AC/DC • Temperature Range: -25°C ~ 90°C • Contact Resistance: Inital value/7mΩ maximum. After environmental testing/10mΩ maximum • Insulation Resistance: 1,000MΩ minimum • Withstanding Voltage: 2,000V AC/minute

Rib-Cage™ High Density, .050” x .050” (1.27mm x 1.27mm) Pitch, Tolerant Board-to-Board Connector System

Rib-Cage is a versatile family of two-piece, two-row pin-and-socket connectors for right angle and mezzanine connections between printed circuit boards (PCB) or flexible printed circuits (FPC).

Features: • Exclusive Rib-Cage multi-point, gold plated receptacle contacts provide optimal reliability in high vibration and shock-prone applications • High density .050” (1.27mm) x .050” (1.27mm) double row contact grid occupies only 20% of the volume of comparable 0.100” pitch systems • Polarization prevents mis-mating

Applications: • Shock resistant and vibration-prone electronic applications • Handheld test and diagnostic equipment • Electronic sub-assemblies used in conjunction with fans, motors and mechanical devices

Materials: Contact Plating: 30μ (0.76μm) gold over Nickel in Contact area; lead-free pure tin over Nickel on solder tails

Electrical Performance: 1.0A DC per contact with all contacts energized • Insulation Resistance: 50,000MΩ minimum initial • Withstanding Voltage: 800VAC, RMS at 60Hz
